## PROFESSIONAL SUMMARY

Computer Science graduate (Texas State University, May 2026) with hands-on experience building and shipping full-stack web apps, automating workflows, and collaborating in agile teams. Built a live recipe-discovery app (Tender), ran a freelance web design business with automated lead generation, and hold Stanford Machine Learning and Certiport certifications. Comfortable across the stack - from backend APIs to deployment pipelines.

## EDUCATION

### Texas State University, San Marcos, TX

Aug 2022 - May 2026

B.S. in Computer Science | GPA: 3.56 | Minors: Communications, Mathematics

Relevant Coursework: Data Structures, OOP, Networks & Security, Machine Learning, Computing Systems.

## KEY SKILLS

- Languages: C, C++, Java, Python, JavaScript
- Web & Tools: Node.js/Express, Firebase, SQLite, Git, CI/CD, Vitest, Wireshark
- Software QA & debugging, version control, agile teamwork, communication, adaptability

## PROJECTS

### Tender - Swipe-Based Recipe & Meal-Planning App

Live: tender-a7367.web.app/discover

Node.js | Express | SQLite -> Firebase

- Built a meal-planning module with full CRUD operations, backed by 47 passing automated Vitest tests
- Migrated the backend from SQLite to Firebase and deployed the live app through a GitHub CI/CD pipeline
- Collaborated with a 4-person team using Git branching and weekly agile sprints

### Freelance Web Design Business

Live: johannsteinhoff.github.io/JohannWebsitesforhire

- Built a Google Maps scraper that automatically sources and qualifies potential clients - generating my own leads without paying for lead lists or manual prospecting
- Designed, built, and deployed client websites end-to-end - from design through hosting
- Generated real revenue, demonstrating independent product thinking beyond coursework

### Firewall & Access Control - Texas State University

- Implemented firewall rules and analyzed network traffic with Wireshark to surface misconfigurations
- Applied sandboxing, packet analysis, and vulnerability testing to harden access control

### Object-Oriented Chess Game - Texas State University

- Developed a chess game in Java applying OOP and the Strategy pattern for piece-movement logic
- Managed version control and iterative development with Git

## EXPERIENCE

### Help Desk Technician (ITAC) - Texas State University

Dec 2022 - Feb 2023

- Troubleshoot hardware/software issues for students and faculty as front-line tech support
- Delivered support while ensuring adherence to data confidentiality standards

### Intern - Verizon, Houston, TX

Nov 2021 - May 2022

- Assisted with hardware issuance, maintenance, and troubleshooting
- Mentored peers on effective technology use; conducted group presentations

### Intern - Eagle's Trace Senior Living, Houston, TX

Oct 2021 - May 2022

- Helped elderly residents set up and maintain printers and monitors
- Educated residents on online safety and security awareness

## CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification - Stanford Online
- Java and Python - Certiport
